about spa cover lifters

Spa pool cover lifters improve the whole spa pool experience. Energy efficiency determines how much your spa costs to run. Ease of use determines how often you indulge in your spa. BMH want using your spa pool to be as simple and as cost effective as possible. Basically, spa pool cover lifters make covering and uncovering your spa incredibly simple – no lugging your spa cover around and no heavy lifting. You may find yourself soaking less if you find removing your spa pool cover difficult. An efficient cover lifter makes opening and closing your spa pool easy.

cover rock-it

- spas up to 2.0m square
- clearance :
rear 500mm / side 100mm

how spa cover lifters work

Cover lifters make removing spa covers a simple, one-person operation. The cover lifter is attached to one side of spa. It is designed to support the cover as it swings the cover off the spa. It reduces the physical effort required in removing the cover.

applications & construction

- Spa cover lifters suit most square / rectangular portable spa pools.
- Lifters work on spa covers up to 2400mm square.
- Powder coated tubular aluminium

cover valet pro

- spas up to 2.2m square
- clearance : rear 170mm / side 100mm

cover lifter unique features

- Strong and durable
- Designed for DIY installation
- Options available for most sites
- Gas strut assisted lift options available

cover Rx

- spas up to 2.2m square
- clearance : rear 480mm
