

Soltego solar blankets

warm pools get used

what is a solar blanket?

BMH Solar Blankets are high strength, long lasting pool insulation covers designed to prevent water heat loss and evaporation. BMH Solar Blankets are made using U.V. and pool chemical stabilised Low Density Polyethylene (LDPE) plastic.

how does a Soltego solar blanket work?

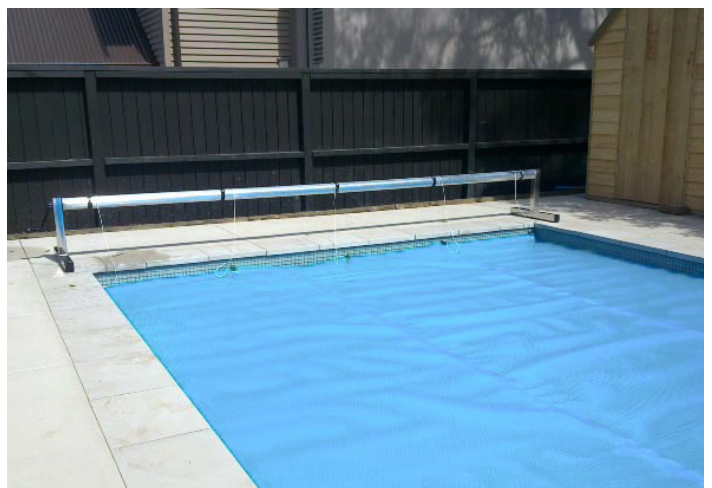

Solar Blankets are translucent which allows radiated solar energy to pass through the cover to release heat into the pool water. Then overnight the air trapped in the bubble profile on the bottom side of the cover acts as an insulating layer to trap the heat in the pool

benefits of a Soltego solar blanket

- Reduced water evaporation
- Low cost heat retention cover
- Reduces chemical consumption
- Extendeds swimming season
- Almost any shape possible
